

For students attending the Imaging Network Ultrasound Course

You will receive the Imaging Network Ultrasound Manual and DVD entitled, "*Heart of the Mission... Leading the Way with Ultrasound.*"

It contains the general information on Ultrasound Physics, OB, Gyn, Fertilization, Guidelines, Procedures, Forms and more. (See table of content.) In order to utilize the ultrasound training more effectively, I am requesting that all students who register for The Imaging Network Ultrasound Training review the material in the manual before the scheduled training. A new and complete power point presentation will also be added to your manual. Some of this material is NOT REQUIRED to learn for this limited ultrasound course for PCC's. This information is for students who desire additional information.

In addition, I would recommend that the students and their directors review the Enclosed DVD. Some of the information will be covered in class and will allow you to prepare any additional questions that your nurse or director may have. The table of contents for The Heart of the Mission Manual is listed below.

Table of Contents for the Imaging Network Diagnostic

Chapter 1: Guidelines & Legalities

Chapter 2: Counseling Techniques

Chapter 3: Procedures/Forms

Chapter 4: U/S Models and Roles

Chapter 5: Informative Articles:
